

# DEMI HAYASHI

## FULL-STACK SOFTWARE ENGINEER

 Los Angeles, CA    hayashi.demi@gmail.com    561-713-5699    github.com/demivlkv    demihayashi.com

## CAREER OBJECTIVE

A motivated Full-Stack Developer with proficiency in the MERN (MongoDB, Express.js, React.js, and Node.js) tech stack and passion for UX/UI. Dedicated to writing efficient, high-performance code that prioritizes user experience and accessibility. Self-sufficient quick learner and inspired team-player with extensive experience in prioritizing the clients' needs and working effectively in both team and independent settings.

## WORK EXPERIENCE

### SOFTWARE ENGINEER @ NEXALURE TECHNOLOGIES (Jan 2024 - Present)

- » Lead the development of front-end and full-stack solutions using TypeScript, React, Redux, NextJS, Node, MongoDB, and SCSS, creating dynamic, responsive user interfaces optimized for contemporary web browsers
- » Collaborate in a 9-member in Agile team, participating in stand-ups, sprint planning, estimation, and retrospectives, resulting in a 15% increase through continuous process improvement and effective teamwork
- » Manage Git for version control, resolving complex merge conflicts to ensure smooth and efficient team collaboration in a fast-paced development environment
- » Actively contribute in code reviews and conduct pair programming, fostering a collaboration, providing constructive feedback, and improving code quality and maintainability

### FREELANCE WEB DEVELOPER @ TOKIO RAMEN (Mar 2020 - Dec 2023)

- » Engineered and revamped a dynamic front-end web application for a local ramen shop using JavaScript, Gatsby.js, GraphQL, Tailwind CSS, and Contentful, increasing website traffic by 40% and enhancing user engagement by 50%
- » Revamped company's visual identity with a new logo, menus, and digital content, resulting in a 20% increase in brand recognition
- » Improved website functionality by 25% through key solutions, enhancing user experience and increasing customer satisfaction

## PROJECTS

### TRIP TIDE (December 2022 - March 2023)

- » Developed a travel-themed MERN-stack web application serving as a comprehensive resource for travel-related information and discussion for travel enthusiasts using React, Tailwind CSS, MongoDB, & GraphQL to handle user interactivity, protection of sensitive user information, and data manipulation

### BOOK NOOK (September 2022)

- » Participated in a collaboration with 5 developers to construct a MERN-stack web application, where users can discuss books, search books, and get book recommendations from other users; played a key role in designing and implementing the user interface, resulting in a seamless and engaging user experience

## SKILLS
